

TELEMYND

Veteran Mental Health Care

Get an online appointment with a licensed mental health provider without the commute or delay.

CALL (866) 991-2103

Telemynd believes every veteran deserves high-quality mental healthcare that is accessible from anywhere. That's why we built a network of therapists and prescribers who provide mental health services for the veteran community. With our secure virtual platform, you can receive the care you need, from wherever you are.

Covered By Your Benefits

Veterans have complete access to our national network of licensed therapists and prescribers. Ensuring no matter where you are, we have licensed providers available for you.

Designed to Meet Your Needs

Access a range of mental health services, from talk therapy to e-prescription medication and more. We offer the care that's right for you, whether that's occasional support or more targeted, intensive care.

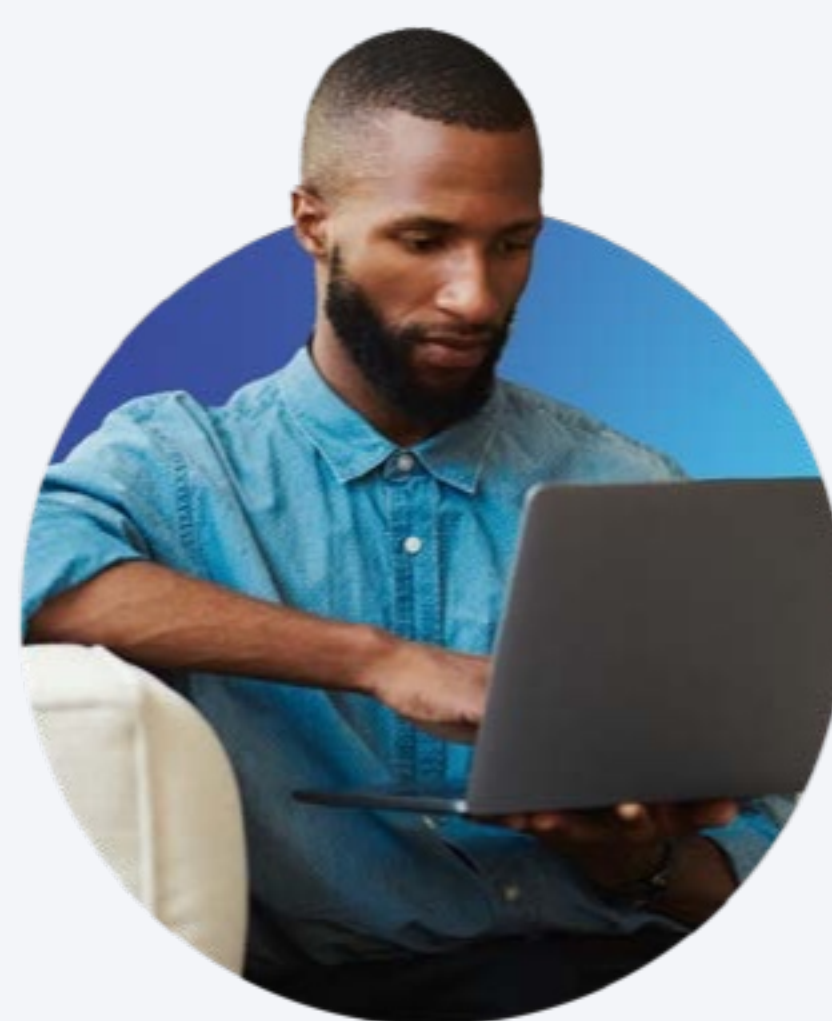

Personalized at Every Step

Not sure what kind of support you need? We can help. A personal care coordinator will assist you in identifying your needs and connecting you with a provider uniquely qualified to support you.

How To Get Started With Telemynd

Contact your local VA and inform them that you want a behavioral health authorization for Telemynd.

The VA will then process and send an authorization code directly to us and share it with you as well.

If you have the authorization code, call for verification and paperwork retrieval. Without it, VA will forward your request, and we'll coordinate your first appointment.

300K+

Hours of mental health care delivered to military members, families, and veterans each year.

98%

Of users say their needs are met and their condition is treated effectively.

97%

Of users say they would refer a close friend or family member to Telemynd.
